

SYED MOHAMMAD SAMEER

AI & ML | Full-Stack Development | Computer Vision

Kadapa, AP • syedsame2244@gmail.com • +91 9951970441 • github.com/samxiao0 • linkedin.com/in/samxiao0 • samxiao.me

PROFESSIONAL SUMMARY

AI & ML undergraduate with hands-on experience in full-stack web applications and AI-powered systems using React, TypeScript, Python, Firebase, and Computer Vision. Skilled in building scalable real-time applications with modern frameworks, cloud services, and AI-based workflows.

EDUCATION

- | | |
|---|--------------------|
| • B.Tech in Artificial Intelligence & Machine Learning
Annamacharya Institute of Technology & Sciences (AITS), Kadapa CGPA: 8.34 / 10.0 | 2023 – 2027 |
| • CBSE Senior Secondary (Class XII) – 70%
Kendriya Vidyalaya, Kadapa | 2022 |
| • CBSE Secondary (Class X) – 78%
Montessori Indus School, Kadapa | 2020 |

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java (Basics), C (Basics)

AI / ML: TensorFlow, Scikit-learn, YOLOv7, Computer Vision, Neural Networks, LLM Experimentation

Web Dev: React.js, Node.js, Firebase, Supabase, Tailwind CSS, HTML5, Flask, PWA

Tools: Git, GitHub, VS Code

KEY PROJECTS

BunkMaar – Student Attendance Management System | Live: bunkmaar.tech

React, TypeScript, Vite, Tailwind CSS, Zustand, Firebase, Recharts, PWA

- PWA-ready attendance platform with real-time Firebase sync, timetable, subject analytics, and attendance prediction.
- Responsive mobile-first UI with dark/light themes, offline capability, and local/cloud data persistence.
- Built attendance percentage estimator helping students track and plan required attendance targets.

Civic Eye – AI Civic Issue Reporting Platform (Prototype Ready)

React, TypeScript, Supabase, Deno, Tailwind CSS, React-Leaflet, AI/ML

- Full-stack civic platform with live camera capture, EXIF GPS extraction, and reverse geolocation for auto area tagging.
- AI-powered image analysis to classify issue type, department, and priority using structured AI responses.
- Interactive clustered map with real-time geotagged issue visualization and secure media storage.

Group Photo Attendance System (Prototype Ready) | Live: unifacesync.vercel.app

Python, Computer Vision, AI/ML

- Two-stage pipeline using face detection and recognition models for automated classroom attendance.
- Classroom-scale recognition workflow with AI-based automation; prototype deployed on Vercel.
- GitHub: github.com/samxiao0/unifacesync

LEADERSHIP & ACHIEVEMENTS

- President, ThinkBotz (2025–27): Leading technical events, symposium coordination, and student engagement for the CSE-AI&ML dept at AITS Kadapa.
- Class Representative: Coordinating academic activities for 60+ students since first semester.
- Smart India Hackathon 2024: National-level participant – AI-based space debris collision avoidance concept.
- AI Tools Hackathon 2025: Built a live object detection system using YOLOv7 for real-time monitoring.

CERTIFICATIONS

- Prompt Engineering for AI – edX (2024)
- SAMSLESHANA 2024 – National Level Technical Symposium Certificate
